For more information, see [www.yhdyskuntateknikka.fi](http://www.yhdyskuntateknikka.fi)

## Esteemed co-operative partner!

We invite you to assist in implementing the 15th Infratech exhibition. Infratech is Finland's largest seminar and exhibition event in the field. A total of nearly 7,000 professionals are anticipated to attend the event to supplement and update their expertise in the field.

The exhibition will be held in Turku Fair and Congress Center, which is one of Finland's largest fair organisers. The last time that the Infratech event was held in Turku was in 2007, when this mega event attracted an enormous amount of interest.

Turku Fair and Congress Center is a versatile venue for fairs, festive occasions, meetings and congresses, and the Center is located only about 10 minutes from the centre of Turku. The Center comprises 16,000 m<sup>2</sup> of hall space, auditorium and meeting rooms, parking for 3,000 cars, and a new, fantastic catering service.

As the organisers of the event, we are looking forward to a very diverse and successful exhibition. The event will bring together representatives, experts and buyers from a wide range of product groups. The most valuable part of the three-day event will undoubtedly be the opportunity to establish contacts with other players in the field.

We welcome you to join us as one of the exhibitors at Infratech 2011!

## Infratech 2011 – the meeting venue for professionals in the field

The Infratech 2011 exhibition brings the entire field together for the 15th time! The event is expected to attract nearly 7,000 visitors to the Turku Fair and Congress Centre on 18 – 20 May 2011. Infratech 2011 provides an exceptional opportunity for establishing contacts, meeting one-on-one with other professionals, and building up your company image. The professional knowledge and expertise offered by the event organisers guarantee quality that is highly valued by both exhibition guests and exhibitors.

### Wide representation serves as the foundation of the exhibition

Of those organisations implementing the event, the Finnish Water and Waste Water Works Association (VVY) serves as a representative of water supply and sewerage expertise. Infra, the Central Association of Civil Engineering Contractors in Finland, will share its professional knowledge in the field of earthworks and hydraulic engineering, as well as expertise in work machine contracting and related services. The Finnish Association for Municipal Engineering (SKTY) is a non-profit professional organisation for engineers, architects and other municipal infrastructure experts in charge of carrying out demanding engineering tasks. The Finnish Road Association (STY) will bring its expertise in road, highway and traffic development. At the exhibition,

the Finnish Solid Waste Association (JLY) and its interest groups will share their expertise in the area of waste management and transportation, and provide a forum for representatives of waste treatment plants and waste management companies.

### Training events and public lectures

The diverse Infratech 2011 exhibition is one of the many events scheduled for the Infratech Week. During the week, the event organisers will offer specific training sessions, that have proven to be very popular. Exhibition guests will be able to take advantage of a wide range of free lectures and information sessions offered by exhibitors. The themes for the lectures are "The decade of community infrastructure maintenance" (Weds., 18 May and Thurs., 19 May) and "Community development services for isolated areas" (Fri., 20 May).

### More than 200 exhibitors participated in Infratech 2009

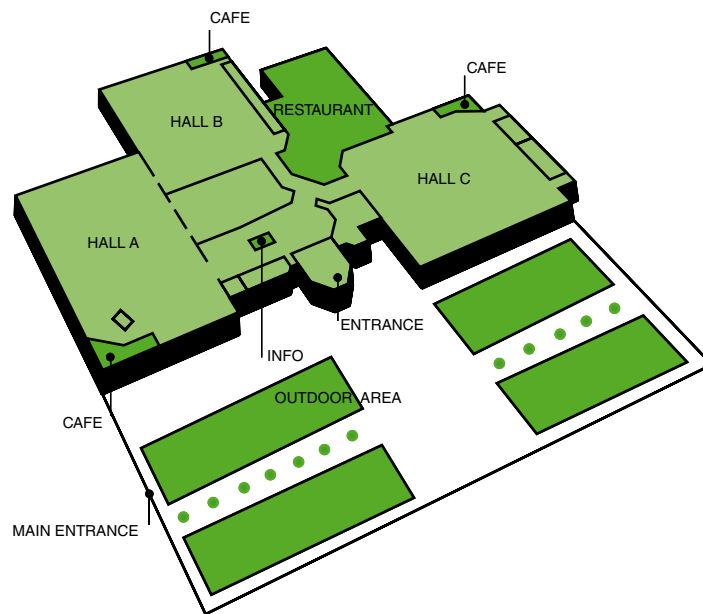

Infratech 2009 was held in Tampere. During the three-day event, approximately 6,100 exhibition guests visited the exhibition stands and attended the lectures. The total exhibition area covered 5,970 m<sup>2</sup>, with 3,513 m<sup>2</sup> indoors and 2,457 m<sup>2</sup> outdoors. The event attracted a total of 201 exhibitors.
